

Education and Research: Testing Hypotheses

Satellite EARTH Workshop - Beaufort, NC

EARTH (Education and Research: Testing Hypotheses) provides

teachers with means for accessing real-time data and integrating it with existing educational standards and tested curriculum through interactive and engaging activities. EARTH uses near-real-time data from ocean observatories to design and test outreach with the Internet as an interface to scientists, teachers, students, and the public.

The North Carolina Coastal Reserve on Pivers Island in Beaufort will host EARTH's Satellite Workshop **August 16, 2016 from 9:00am - 4:00pm**. The 1-day workshop is open to informal and formal educators. Lunch, resources, and CEUs will be provided to workshop participants.

Reserve your spot today!!
